

Order and setup of ABL reev ready

The charging stations are ready for activation of the reev Dashboard in just 5 steps by the electrician.

Step 1: Order

- ABL reev ready can be ordered from electrical wholesalers via an electrician and from our other sales partners. If you have any questions, the reev and ABL sales team are happy to help.

How to order?

- 1) Select ABL Wallbox reev ready
- 2) Select reev ready license key (Compact oder Pro)
- 3) Have preconfigured charging station(s) and reev ready license key delivered

Powerful ABL Hardware

reev ready licence keys

All ABL reev ready hardware models come with an inserted reev SIM card and preconfigured charging point IDs.

For each charging point you need a reev ready license key (24 months term) and can choose between the available software licenses Compact and Pro.

Step 2: Installation of the ABL reev ready wallbox(es)

- The electrician installs the wallbox(es)

Step 3: Fill out the online commissioning

- Electrician goes to install.reev.com and completes the online setup form
- The activation code can be found in the reev commissioning instructions
- When the individual activation code from the User Pack is entered, technical data on the charging station is automatically filled in
- The electrician confirms these data and enters few more information - He/she will be notified, when the installed charging station(s) has/have established a connection to the reev backend
- After the installation by the electrician, the CPO as well as the electrician will be notified automatically by mail
- Detailed information about the onboarding can be found in the commissioning instructions enclosed with the wallbox

Step 4: Apply „reev“ sticker to wallbox

- The electrician applies the “reev” sticker to the wallbox

Step 5: Hand over User Pack to CPO

- The electrician hands over the User Pack to CPO of charging infrastructure

Charging Point Operator: Setting up the reev Dashboard

- CPO goes to reev.com/setup and registers the charging station using the activation code from the user pack
- Now the operator can easily activate the reev Dashboard with the reev ready license keys at reev.com/setup
- After a processing time of approximate 2 days, the operator receives an email including a link via which the access to the reev online portal can be activated
