

## reev Appoints Energy Expert Rard Rijcken to Its Board of Directors

*Rard Rijcken Brings Extensive Energy Expertise and a Robust Benelux Network to reev*

**Munich, December 03, 2024**

[reev](#), a leading provider of intelligent charging and energy management solutions, is proud to welcome Rard Rijcken as a new member of its board. With decades of experience in the energy sector and a well-established network across the Benelux region, Rijcken will play a pivotal role in supporting reev's expansion strategy.

### **Rard Rijcken: A Catalyst for Innovation and Growth**

Rijcken has successfully managed numerous companies in the energy sector during his career, making a major contribution to the decarbonization of energy. His expertise and extensive contacts make him an important addition to the Board, particularly regarding the expansion into the Benelux market and the development of strategic partnerships. His experience and insights in the energy sector will also support the enhancement of reev's existing offerings, including its advanced energy management system reev Balancer. This expertise will help drive value for markets and clients, aligning with reev's commitment to providing innovative and efficient charging solutions.

"We are delighted to welcome Rard Rijcken to the Board," said Eduard Schlutius, CEO at reev. " His profound knowledge of the energy sector and his ability to form strategic alliances will be instrumental in solidifying our position as one of the leading providers of charging infrastructure solutions across Europe."

"I am thrilled to bring my experience and extensive network in the energy sector to reev", explains Rijcken.

"reev has great potential to significantly advance e-mobility in Europe. I see it as an exciting task to advise and support the company on this path."

### **Strategic support from experienced investors**

With Rijcken's appointment, reev has strategically enhanced its board of directors. In addition to Rijcken, the board also includes well-known investors who actively support the company. Future Energy Ventures, a key investor in this year's Series A financing round, brings extensive expertise in scaling energy and mobility companies. Blue Earth Capital, a specialized global impact investor, also participated in the Series A as lead investor, driving the advancement of sustainable technologies. In addition, the German energy supplier N-

ERGIE has been involved as an investor since the beginning and supports reev with its in-depth market knowledge of the German energy sector.

With founder and CEO Eduard Schlutius at the helm and a board supported by experienced players from the energy industry, reev is ideally positioned to drive its expansion and accelerate the transition to climate-friendly mobility across Europe.
