

reev and marco zenner join forces to drive electromobility in Luxembourg

Munich/Luxembourg, 25th February 2025

[reev](#), the leading energy and charging platform for the semi-public sector, and **marco zenner s.à r.l.**, one of Luxembourg's leading wholesale representatives for electrical installation and building technology, are launching a strategic partnership to promote electromobility in Luxembourg.

By combining marco zenner s.à r.l.'s strong market presence and distribution expertise with reev's technological know-how, business customers gain access to tailored energy & charging solutions – covering hardware, software, consulting, and technical support. The focus lies on semi-public applications in areas such as residential buildings, commercial properties, and industrial facilities. The start of this partnership was marked by a well-attended two-day in-house training with installers and industry experts.

“We aim to make electromobility simple and accessible for businesses – with marco zenner as a strong local partner, we are taking a significant step closer to this goal in Luxembourg,” says Jordi Steenman, Country Manager Benelux at reev.

“Our customers expect solutions that are not only future-proof but also easy to use – with reev, we deliver exactly that and actively shape the mobility of tomorrow,” says Henri Watrinelle, Managing Director of marco zenner s. à r.l.

Through this partnership, both companies are sending a strong signal in support of the mobility transition, offering business customers in Luxembourg efficient and scalable energy and charging solutions from a single source.

About reev:

[reev](https://reev.com) is an internationally active software company based in Munich that offers a leading energy and charging platform for the semi-public sector. The company's mission is to promote sustainable and future-oriented mobility. The cloud-based solution ensures easy charging, efficient energy use and optimized load management – designed for companies, gastronomy, parking areas and the housing industry.

As a reliable partner for charge point operators (CPOs), electricians, wholesalers and charging station manufacturers, reev actively contributes to the expansion of the charging infrastructure. Intuitive solutions for administration, control and billing ensure maximum functionality, user-friendliness and security – for smart, connected and sustainable mobility.
